STOPS.

1. *The Largest*—For all ordinary instantaneous exposures when the sun shines.
2. *The Middle*—For instantaneous exposures when the sun-light is unusually strong and there are no heavy shadows; such as in views on the seashore or on the water, or in tropical or semi-tropical climates; also for interiors (time exposures, the time of exposure required is given on next page).
10. *The Smallest*—For cap exposures out doors in cloudy weather. Never for instantaneous exposures. The time required for cap exposures on cloudy days with smallest stop will range from $\frac{1}{2}$ second to 5 seconds, according to the light.

When setting the stops always see that the one to be used is brought to the centre of the lens where it catches.

Cap Exposures in the Open Air.

With Heavy Clouds—From 2 to 5 seconds will be required.

THIS Memorandum should be filled out and kept by the user of the KODAK, as a guide for future exposures. By comparing the results with the Memorandum many errors in regard to light, time for interiors, position, etc., can be avoided, and the novice will be able to make as good an average as the most expert.
